ᐃᐃᐃᐃᐃᐃ ᐃᐃᐃ ᐃ ᐃᐃᐃ ᐃᐃᐃᐃᐃ

ᐃᐃᐃᐃᐃᐃᐃ 2013

The FNEI Conservation Program is building on the momentum we have gained over the past two years and moving into the next phase of the program. We are continuing to work with community members to share energy-saving tips and energy-efficient products, at the same time we are building on our partnerships in your community. Next year, we will be supporting your local power corporations in the implementation of their energy conservation programs as well. This will give us with the opportunity to work with more people in your community to improve the comfort, quality and energy efficiency of homes.

Thank you for embracing energy conservation.

Beat the Heat!

Cooling Without Electricity

Keep your drapes drawn and windows shut during the hot sunlight hours. Open windows during the cooler times of the day to create a draft of cool air.

Unplug and Get Outside!

Encourage your children to unplug the video games and get outside! Electronics give off heat when used for long periods of time

Use Fans to Keep Your Home Cool

Use ceiling fans or floor fans when you need to cool down your home. They use less energy than an air conditioner.

Summer Cooking

Prepare more meals that don't require cooking; or use the oven early in the morning when it is cooler.

5 Tips to Beat the Heat

1. Close your shades and windows during the day to keep the heat out. Open them at night to let the cool air in. Use fans to circulate the air.

2. Use fans to keep your home cool. Ceiling fans and floor fans use less energy than air conditioning. Use fans to circulate the air.

3. Unplug electronics when you're not using them. Electronics give off heat when used for long periods of time.

4. Cook and bake in the morning or evening when it's cooler. Use the oven early in the morning when it is cooler.

LED Christmas Lights:

- use 90% less energy than traditional incandescent lights
- last 2 times as long as incandescent lights, so you can use them year after year.
- 700 LED lights can run 6 hours per day for 30 days costing approximately .50¢ versus incandescent lights, which could cost up to \$35 for the same amount of time!

Use an outdoor timer to turn your Christmas lights on and off automatically- Save yourself money and hassle!
